Message From President

HUMANISM FOUNDATION was founded in 2021. In keeping with the growth and expansion of **HUMANISM FOUNDATION**, we have sought and obtained the status of Gujarat body that can operate Gujarat in the country. Education continues to be the core concern of **HUMANISM FOUNDATION**, as it seeks to improve the quality of teaching imparted in its schools.

Our bid to ensure gender equity, we have been attempting affirmative action's like the partnership **HUMANISM FOUNDATION** entered into to run the "Father and Daughter Alliance", a success by any standard.

HUMANISM FOUNDATION objective is to provide as far as possible equal opportunities to the children, who would, otherwise, have been sulking on the margins of society.

I present the Activity Report and statement of accounts for the year 2022-23.

Your feedback is most welcome.

Mr. Nimal Kumar Dutta (President)

GOAL

Holistic Development of the Society.

VISION

To make our society to be self-supportive in all respect through proper and meaningful utilization of available resources.

MISSION

- i) To eradicate poverty and promote self-reliance by improving the quality of life of the poor deprived community through meaningful socioeconomic growth in all phases of life.
- ii) To educate, organize, advocate and empower the rural poor for promoting development as a liberating force aimed at gender equity, social justice, self-empowerment and entitlement realization.
- iii) To uplift the deprived class of our society by providing them with the necessary things those are required for betterment of life.
- iv) To work on the grassroots level so that the real needy ones can get the basic amenities and can get recognition in the society.

STRATEGY

- ✓ Formation and Nurturing of Self-Help Groups.
- ✓ Exploring Sustainable Livelihood Portfolio.
- ✓ Participatory Development.
- ✓ Micro Planning.
- ✓ Taking up challenge of RCH/HIV/AIDS.
- ✓ Strengthening Local Self Governance.

- ✓ Capacity Building through organization Seminars, Workshops, Training both Vocational and Non- Vocational and Camps.

Our Activities

- ✓ Awareness Camp
- ✓ Cloth Distribution
- ✓ Food Distribution
- ✓ Tree Plantation
- ✓ Notable Days celebration
- ✓ Cultural Programme
- ✓ Women Computer
- ✓ Educaion
- ✓ Help to Poor Student
- ✓ Blood Donation Camp
- ✓ Plastic Clearing Programme

Awareness Camp

This awareness program was conducted with the intention to increase the mental health literacy rate among the teaching staff. Principal spoke about the importance of the Basic Counselling Course and acknowledged the need for it. He also encouraged the trained staff to form a system to reach students in their respective department. Despite the interference to their capacity to focus on education, students continue to delay or fail to seek help for their problems because of lack of knowledge about the importance of mental health and the stigma to seek help from the counseling services that is provided in the college. In managing the distressing symptoms, students are drawing on past or common coping strategies like drugs, alcohol, unhealthy relationships, social withdrawal, absenteeism, seeking symptomatic somatic treatments and complex inter and intrapersonal issues.

Cloth Distribution

Our Organization distribute winter blankets to patients, people living on the streets every winter. Our organization runs Blanket Donation Campaign, where we provide high-quality warm blankets to the underprivileged living in the in our country. All care is taken to provide timely help to the beneficiaries e.g. woolens & sweaters in winter and cotton in summer. Our Organization are encouraged to conduct surveys or compile a list of beneficiaries across different regions / villages to facilitate packing as well as distribution. Where is no better gift than providing warm clothing to the needy during the winter season. The garment department first sorts out the clothes as per the age and sex of beery group. It then discards torn clothes, and after the final count, it packs and transports them to the agency destination. There cannot be a bigger satisfaction than saving someone's life.

Food Distribution

HUMANISM FOUNDATION distribute food item the most essential need of every person. The Governor is further pleased to order that in rest of the districts of West Bengal viz. Darjeeling Area, the present method of distribution, i.e., those who have already received the Digital Ration Cards and their old paper Ration Cards being stamped with “NFSA/RKSY Cards Delivered” will get food grains on production of Digital Ration Cards and the others who have submitted applications in Form-III/IV but have not received the Digital Ration Cards shall continue to receive the food grains on the basis of production of the old paper Ration Card along with a receipt copy of Form-III/IV until further order. , the beneficiaries shall continue to draw food grains on production of their existing old paper ration cards. Separate order is being issued shortly regarding method of distribution of digitized ration cards.

Tree Plantation

Our Organization In simpler words, tree plantation means to plant seedlings in the ground for growing more trees in an area. Tree plantation is very much required in countries where deforestation has increased a lot. With tree plantation, one can restrict the problems that may arise due to deforestation. One of the major problems of deforestation, which is pollution, can be reduced to some extent through the increased rate of tree plantation. In this short paragraph on tree plantation, it is cleared that tree plantation is very important. According to a tree plantation paragraph for Class 10, it is said that a reduced rate of tree plantation on heavy deforestation areas can cause climate change because deforestation increases the level of carbon dioxide, and without the required amount of tree, it is difficult to remove it from the air. Through this short essay on tree plantation, one can get some idea of what are the true requirements of tree plantation in today’s time and why it is so important for the world.

Notable Day's Celebration

Our organization celebrate notable day in this day lots of peoples and children in this program we discuss for future and environment we also organize debate in children and adults.

Cultural Program

The annual cultural program is an event that is eagerly awaited by many. It is a time when people come together to celebrate their cultural heritage and enjoy a fun-filled day of entertainment. In this essay, we will explore the highlights of the annual cultural program, including the lively decorations, exciting performances, and mouth-watering food stalls. The venue for the annual cultural program is always decorated in a colorful and vibrant manner. The decorations are inspired by the cultural traditions of the region, with bright colors and intricate designs adorning every corner. The atmosphere is electric, with people dressed in traditional clothing and the sound of music and laughter filling the air. It is truly a sight to behold and sets the perfect tone for the day's festivities.

Women Computer

Women in computing were among the first programmers in the early 20th century, and contributed substantially to the industry. As technology and practices altered, the role of women as programmers has changed, and the recorded history of the field has downplayed their achievements. While computing began as a field heavily dominated by women, this changed in western countries shortly after World War II. In the US, recognising software development was a significant expense, companies wanted to hire an "ideal programmer". Psychologists William Cannon and Dallis Perry were hired to develop an aptitude test for programmers, and from an industry that was more than 50% women they selected 1400 people, 1200 of whom were male.

This paper was highly influential and claimed to have "trained the industry" in hiring programmers, with a heavy focus on introverts and men.

Education

Education plays various roles in society, including in social, economic, and personal fields. On a social level, education makes it possible to establish and sustain a stable society. It helps people acquire the basic skills needed to interact with their environment and fulfill their needs and desires. In modern society, this involves a wide range of skills like being able to speak, read, and write as well as to solve problems and to perform basic arithmetic tasks. It also includes the ability to handle information and communications technology. Children are socialized into society by acquiring these skills. Another key part of socialization is to learn how to live in social groups and interact with others by coming to understand social and cultural norms and expectations. This requires an understanding of what kinds of behavior are considered appropriate in different contexts. This way, new members are introduced to the culture, norms, and values that are dominant in their society. Socialization happens throughout life but is of special relevance to early childhood education. It enables a form of social cohesion, stability, and peace needed for people to productively engage in their daily business. Education plays a key role in democracies by increasing civic participation in the form of voting and organizing and through its tendency to promote equal opportunity for all.

Help to Poor Student

Our Organization conduct many activities to help the poor student like distribute bag ,books, spackles ,food. Your generous donation to IVI will not only help stop 'preventable' blindness, particularly among children from underprivileged communities, but also help strengthen the eye care delivery infrastructure in India.

Uncorrected refractive error remains a major cause of avoidable vision impairment and the second most common cause of blindness in India. Visual

impairment caused by this issue is preventable or treatable, usually through a simple pair of glasses.

Your contribution will help meet the challenge of reversing the rather grim eye care situation for our country, currently ranking among countries with the highest number of visually impaired population. Uncorrected refractive error remains a major cause of avoidable vision impairment and the second most common cause of blindness in India. Visual impairment caused due to uncorrected refractive error is preventable or treatable, usually through a simple pair of spectacles.

Blood Donation Camp

Voluntary Non-Remunerated Blood Donation (VNRBD) is the cornerstone of a safe and sufficient blood supply. GBF works with blood collectors in low and middle-income countries to establish and enhance the recruitment, retention and management of volunteer donors.

A system of voluntary donation driven by benevolence is preferable. However, creating a community appreciation of blood donation is challenging; as is recruiting, motivating and retaining donors and managing them effectively.

Plastic Clearing Programme

In-No-Plastic (Innovative approaches towards prevention, removal and reuse of marine plastic litter) is a three year EU funded project with the goal to develop and demonstrate nano-, micro-, and macro-plastic clean-up technologies in the aquatic ecosystems. The project is funded within the Horizon 2020 Research and Innovation programme, within the pilot action for the removal of marine plastics and litter. This topic is in support of the European Strategy for Plastics in a Circular Economy.

The approach taken is a combination of social and technical strategies targeting the industrial hot spots through cooling water systems (CWS), harbours, lagoons, shores and shallow seawater. The technical approach consists of comparing the existing plastics removal methodologies with multiple developing technologies at varying testing sites in Europe and in the Caribbean.

Thank You
